Cara Masuk ProQuest

The image shows a screenshot of the ProQuest website with several red annotations and arrows indicating the login process:

- 1** A red box highlights the address bar containing the URL `https://www.proquest.com`. A red arrow points from this box to the right.
- 2** A red box highlights the navigation menu item "Log in through your library to access more features." with a red arrow pointing to the right.
- A red box highlights the "ProQuest Account" login form, which includes fields for "Username" (containing "ProQuest username") and "Password" (containing "ProQuest password"), and a "Log in" button. A red arrow points from this box to the right.
- A red box highlights the text "Ketikan Username & Password yang telah didapat dari Institusi" (Type the Username & Password you have received from the Institution), with a red arrow pointing to the login form.
- A red box highlights the text "Ketikan URL : https://www.proquest.com/" (Type the URL : https://www.proquest.com/), with a red arrow pointing to the address bar.

The background of the screenshot shows the ProQuest website interface, including the "Find your library" section, a "Helpful tip" about campus access, a search bar, and a navigation menu with categories like "Scholarly Journals", "Books", "Videos & Audio", "Dissertations & Theses", and "More". The background image features the Eiffel Tower.

Tampilan Layar Utama ProQuest

The screenshot shows the ProQuest homepage with a teal header. The main navigation bar includes 'Basic Search', 'Advanced Search', 'Publications', and 'Databases (3)'. A search bar is prominently displayed with filters for 'Full text' and 'Peer reviewed'. Below the search bar, there are four help cards: 'pd()', 'ti()', a navigation icon, and 'How do I choose a topic?'. A user menu is visible in the top right corner.

Effect and Nursing Satisfaction of Bedside Nursing Combined with Detail Nursing in Clinical Nursing of Gastroenterology Department

Ai, Hongyan; Peng, Shuqin. *Journal of Oncology; New York* Vol. 2021, (2021). DOI:10.1155/2021/6839555

Full text Full text - PDF Abstract/Details

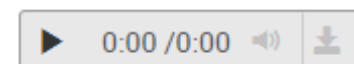

Abstract

...se of the study was to investigate the therapeutic effect and nursing satisfaction of the research group in the gastroenterology department. *Methods.* 112 patients with gastrointestinal diseases admitted to the research group and randomly divided into a research group ($n = 56$) and a control group. On this basis, the research group received bedside nursing combined with detail nursing, and the control group received detail nursing only. The two groups were compared. *Results.* There were no significant differences in sex ratio, age, and education level between the two groups ($P > 0.05$). The VAS scores in the two groups after intervention were significantly different ($P < 0.01$), and the VAS scores in the research group after intervention were significantly higher than those in the control group. The nursing skills and nursing responsibility in the research group were significantly higher than those in the control group. There were no significant differences between the two groups in the number of patients who were very satisfied. The number of very satisfied cases in the research group was significantly higher than that in the control group.
